PREFACE

This report is one in a series on Soviet Ground Force and Logistic installations being prepared for a DIA/CIA Panel. The series is being coordinated, published and disseminated by NPIC. The photographic analysis is being performed by the NPIC Photographic Analysis Group, the CIA Photographic Intelligence Division (NPIC), and the Production Center 1P1a (DIA). The photographic analysis for this particular report was performed by the Production Center 1P1a.

In the interest of uniformity, the titles and letter designators for the facilities observed at these installations are identical with those appearing in the project requirement. When a specific facility is not observed both its title and letter designator are omitted in the report.

Titles and letter designators for the various facilities are as follows: (A) railroad service, (B) road service, (C) landing strips, (D) administrative and troop housing areas, (E) storage areas, (F) ammunition storage areas, (G) POL storage areas, (H) other buildings and facilities, (J) equipment storage/maintenance areas, (K) athletic fields, (L) small arms firing ranges, (M) driver training areas, (N) tank/assault gun firing ranges, (P) flat trajectory firing ranges, (Q) artillery emplacements (batteries), (R) infantry or combined arms field training areas or courses, (S) special training facilities, (T) unidentified facilities or tracking activity.

SUMMARY

Riga Ammunition Depot Ropazi is located approximately 20 kilometers (km) east of Riga at the east end of Ropazi (Figure 1). The depot is divided into 3 separate sections: a general storage area of approximately 50 acres, an ammunition/storage area and a support area. The depot (Figures 2 and 3) probably stores explosives and general supplies for the Riga Training Area (10 km north) and for the numerous military installations in the city of Riga.

The general storage area is located adjacent to the railroad at the east end of Ropazi and contains a rail spur from the Riga-Sigulda

rail line, and 35 buildings. The ammunition storage area is not rail served, but has a good interior road net and contains 7 large and 45 small revetted/bunkered explosives storage buildings. Both localities are in heavily wooded areas, are double fenced, and contain firebreaks. The support area, which is not fenced, contains 1 possible barracks and 5 support buildings.

A comparative analysis of the [] KEYHOLE missions covering the area between [] reveals no major changes in the installation.

DESCRIPTION OF INSTALLATION

Railroad Service

A rail spur from the Riga-Sigulda rail line enters Area E, 1 km north of areas D and F.

Road Service

Good interior road net and good all-weather roads connect the Depot with Riga and Sigulda.

Administrative and Troop Housing Area

Area D contains 1 possible barracks and 5 support buildings.

General Storage Area

Area E contains 1 possible administration building, 26 storage buildings and 8 support buildings.

Ammunition Storage Area

Area F contains 2 storage buildings, 7 large revetted ammunition storage buildings and 45 small bunkered/revetted buildings.
